High technology in tune with the market.

The ideal solution for anyone looking for a LED operating light with high performances at an affordable price. Faro patented optical system, removable and sterilizable handles and, from now on, a new electronic board which ensures the perfect compatibility with the video acquisition systems and diagnostic tools, that nowadays are even more common in the dental practices.

Patented optical project with reflected light. Thanks to its exclusive optical project with reflected light, and through the 258 small reflecting facets included in each of the two parables, MAIA avoids the direct vision of the 2 LEDs, creating a 175 x 100 mm spotlight area absolutely uniform. The accurate definition of the spotlight removes the glare, protecting your patients' eyes.

Progressive adjustment and memorization of illuminance. The new electronic control of the illuminance, activated by joystick or sensor, adjusts the light from maximum to minimum power without any interruption, keeping the colour temperature constant. Automatic memorization of used light intensity also after switching off the unit's power or after the 'rinse' function.

ELECTRONIC CONTROLS

- Switching on/off from the head
- Switching on/off version also from unit or by foot control

OPTIONAL

- Remote control from the unit: allows user to repeat all switch functions
- Rotation on Third Axis
- Complete Ral colours range
- Extended Warranty to 24 months

MAIA handles are removable and sterilizable.
FARO S.p.A. founded in 1948 by Osvaldo Favonio, designs and manufactures equipment for dental units, dental practices and dental labs. Manufacturing, design, research & development, all take place in our over 5,000 square metre plant in Ornago (MB), Italy.

Over the years, the company has become a world leader in this specific sector: a role gained by commitment to technology, research and design and an ability to understand the real needs of end users.

Utmost quality is assured by the internal management of the whole manufacturing cycle and a qualified and efficient pre and after-sales service. FARO experience best expresses the pride of a product made entirely in Italy.

The six product lines that manufacture and market offer a comprehensive choice of solutions for equipping dental practices and laboratories.

**ILLUMINATION**
LED AND HALOGEN
includes several models of lamp, made with LED and HALOGEN technology;

**APPLICATION SETS**
AND ACCESSORIES
essential for mounting the lights and their accessories to the dental unit and within the practice;
